1 Title, affiliation and language
A shared section that applies to all BSc and MSc Programmes at the Faculty of Science is linked to this programme-specific curriculum.

1.1 Title
The MSc Programme in Statistics leads to a Master of Science (MSc) in Statistics with the Danish title: Cand.scient. (candidatus/candidata scientiarum) i statistik.

1.2 Affiliation
The programme is affiliated with the Study Board of Mathematics and Computer Science, and the students can both elect, and be elected, to this study board.

1.3 Corps of external examiners
The following corps of external examiners is used for the central parts of the MSc Programme:

• Corps of External Examiners for Mathematics (matematik).

1.4 Language
The language of this MSc Programme is English.

2 Academic profile
2.1 Purpose
The MSc programme in Statistics is a research-based programme, the objective of which is to provide the student with the knowledge of and insights into the main fields and methodologies of mathematical statistics required to work independently within this field.

2.2 General programme profile
The programme provides a general introduction to the main fields of mathematical statistics, the underlying probability theory, and the calculation techniques required to solve practical statistical problems. It is subsequently possible to specialise within one of these fields.

Statistics, Mathematics and Computer Science are the key subject areas of the programme.

2.3 General structure of the programme
The MSc Programme is set at 120 ECTS.

There are no defined specialisations in this programme.

2.4 Career opportunities
The MSc Programme in Statistics qualifies students to become professionals within business functions and/or areas such as:

• A PhD programme
• Health research.
• Statistical functions in the pharmaceutical industry.
• The financial sector.

3 Description of competence profiles
Students following the MSc Programme acquire the knowledge, skills and competences listed below. Students will also acquire other qualifications through elective subject elements and other study activities.
3.1 Competence profile
On completion of the programme, an MSc in Statistics has acquired the following:

Knowledge about:
- Selected research-active fields.
- Stochastic processes.
- Statistical models applicable to broad classes of data.
- Likelihood methods and likelihood-adjacent methods.
- Conditioning and Markov properties of probability distributions.
- Sufficiency, ancillarity and other factorization properties of statistical models.
- Frequentistic and Bayesian principles of statistical inference.

Skills in/to:
- Read and understand mathematical and statistical original literature.
- Communicate mathematical questions and issues on a scientific basis both with fellow experts and with specialists in other fields.
- Account orally and in writing for statistical inquiries into open problems.
- Apply general asymptotic methodologies to specific probabilistic models.
- Develop probabilistic models for specific statistical applications.
- Analyse concrete data sets using standard as well as tailor-made statistical models.

Competences in/to:
- Conduct an independent statistical analysis on a measure theoretical foundation of complex experiments and observational studies and divide it into smaller easily accessible challenges.
- Investigate open statistical problems using probability theory methods.
- Develop new statistical solution models.
- Independently take responsibility for his or her own professional development and specialisation.
- Moreover, a holder of an MSc degree in Statistics can scientifically reflect on methods for analysing and resolving questions in statistics and probability theory.

4 Admission requirements
With a Bachelor’s degree in Mathematics with the BSc elective course package (bachelorvalgfagpakken) in Statistics from the University of Copenhagen the student is granted reserved access and guaranteed a place on the MSc Programme in Statistics if the student applies before the application deadline during the first application period after the completion of the Bachelor’s degree.

4.1 Applicants with a closely related Bachelor’s degree
Applicants with a Bachelor’s degree in Actuarial Mathematics, Mathematics-Economics or Mathematics from the University of Copenhagen are directly qualified for admission to the MSc Programme in Statistics if their programme includes the following:
- Subject elements in statistics on a measure theoretical basis (at least 15 ECTS).

Applicants with a Bachelor's degree in Mathematics with the BSc elective subject course package (studeretning) in Mathematical Modelling from the University of Aarhus are directly qualified for admission to the MSc Programme in Statistics.
4.2 Applicants with a Bachelor’s degree in Natural Science and IT
Applicants with a Bachelor’s degree in Natural Science and IT with specialisation in Mathematics and with the MSc admission course package in statistics from the University of Copenhagen are directly academically qualified for admission to the MSc Programme in Statistics.

4.3 Applicants with a related Bachelor’s degree
Applicants with a Bachelor’s degree in the field of Science from the University of Copenhagen, or other Danish or international universities may be admitted if the programme includes the following:

- Subject elements in mathematical analysis, including measure theory (at least 22.5 ECTS).
- Subject elements in linear algebra (at least 7.5 ECTS).
- Subject elements in statistics on a measure theoretical basis (at least 15 ECTS).

4.4 Other applicants
The Faculty may also admit applicants who, after an individual academic assessment, are deemed to possess educational qualifications equivalent to those required in Subclauses 4.1-3.

4.5 Language requirements

4.5.1 Applicants from Nordic universities
Applicants with a Bachelor’s degree from Nordic universities must as a minimum document English language qualifications comparable to a Danish upper secondary school English B level.

4.5.2 Non-Nordic applicants
Applicants with a non-Nordic Bachelor’s degree must be able to document English proficiency corresponding to an IELTS test score of minimum 6.5 or a TOEFL test score of minimum 83 (Internet-based).

5 Prioritisation of applicants
If the number of qualified applicants to the programme exceeds the number of places available, applicants will be prioritised as follows:

1) Applicants with a Bachelor’s degree in Mathematics with the BSc elective course package (bachelorvalgfagpakken) in Statistics from the University of Copenhagen seeking admission by way of direct extension of their completed BSc programme.
2) Applicants with a Bachelor’s degree in Mathematics, Actuarial Mathematics, Mathematics-Economics, Natural Science and IT with specialisation in Mathematics and the MSc admission course package in Statistics from the University of Copenhagen.
3) Other applicants with a Bachelor’s degree from the University of Copenhagen.
4) Other applicants.

If the number of qualified applicants within a category exceeds the number of places available, applicants will be prioritised according to the following criteria (listed below in prioritised order):

- Total number of ECTS within the relevant academic fields and the grades obtained. If different grading systems make comparison impossible, applicants will be prioritised on the basis of an individual evaluation by the Admission Committee.
6 Structure of the programme
The compulsory subject elements, restricted elective subject elements and the thesis constitute the central parts of the programme (Section 21 of the Ministerial Order on Bachelor and Master’s Programmes (Candidatus) at Universities).

6.1 Programme components
The programme is set at 120 ECTS and consists of the following:
- Compulsory subject elements, 30 ECTS.
- Restricted elective subject elements, 30 ECTS.
- Elective subject elements, 30 ECTS.
- Thesis, 30 ECTS.

6.1.1 Compulsory subject elements
All of the following subject elements are to be covered (30 ECTS):
- NMAK11005U Discrete Models (DisMod) Block 1 7.5 ECTS
- NMAK16010U Graphical Models Block 2 7.5 ECTS
- NMAK11022U Regression (Reg) Block 3 7.5 ECTS
- NMAK14028U Project in Statistics (ProjStat) Block 4 7.5 ECTS

6.1.2 Restricted elective subject elements
30 ECTS are to be covered as subject elements from the following list:
- NMAK11003U Advanced Probability Theory 1 (VidSand1) Block 1 7.5 ECTS
- NMAK16005U Computational Statistics Block 1 7.5 ECTS
- NMAK15005U Advanced Vector Spaces (AdVec) Block 1 7.5 ECTS
- NMAA05025U Econometrics 2: Statistic Analysis of Econometric Time Series (StatØ2) Block 1 7.5 ECTS
- NDAK15014U Advanced Topics in Machine Learning Block 1 7.5 ECTS
- NMAK17010U Stochastic Models and Inference for Genetic Data Block 1 7.5 ECTS
- NMAK17007U Monte Carlo Methods in Insurance and Finance Block 1 7.5 ECTS
- NMAK13005U Introduction to Extreme Value Theory (IntroExtremValue) Block 2 7.5 ECTS
- NMAK11011U Advanced Probability Theory 2 (VidSand2) Block 2 7.5 ECTS
- NMAK16019U Survival Analysis* Block 2 7.5 ECTS
- NMAK17001U Causality Block 2 7.5 ECTS
- NMAK17008U Sparse Learning Block 2 7.5 ECTS
- NDAK15007U Machine Learning (ML) Block 2 7.5 ECTS
- NDAA09009U Numerical Optimization (NO) Block 3 7.5 ECTS
- NMAK17006U Modern Topics in Statistics Block 3 7.5 ECTS
- NMAK17005U Machine Learning Methods in Non-Life Insurance Block 3 7.5 ECTS
- NMAA13025U Theoretical Statistics (TeoStat) Block 3 7.5 ECTS
- NDAK14007U Applied Programming (APP) Block 4 7.5 ECTS
- NMAK16018U Structural Equation Models Block 4 7.5 ECTS

* The course is not offered in the academic year 2017/18.

6.1.3 Elective subject elements
30 ECTS are to be covered as elective subject elements.
All subject elements at MSc level may be included as elective subject elements in the MSc Programme.

BSc subject elements corresponding to 15 ECTS may be included in the MSc Programme.
Projects outside the course scope may be included in the elective section of the programme with up to 15 ECTS. The regulations are described in Appendix 5 to the shared section of the curriculum.

Projects in practice may be included in the elective section of the programme with up to 15 ECTS. The regulations are described in Appendix 4 to the shared section of the curriculum.

6.1.4 Thesis
The MSc Programme in Statistics includes a thesis corresponding to 30 ECTS, as described in Appendix 2 to the shared curriculum. The thesis must be written within the academic scope of the programme.

6.1.5 Academic mobility
The curriculum makes it possible to follow subject elements outside the Faculty of Science.

For students admitted in September the academic mobility in the MSc Programme in Statistics is placed in block 1+2 of the 2nd year.

For students admitted in February the academic mobility in the MSc Programme in Statistics is placed in block 3+4 of the 2nd year.

Academic mobility requires that the student follows the rules and regulations regarding pre-approval and credit transfer.

In addition the student has the possibility to arrange similar academic mobility in other parts of the programme.

7 Exemptions
In exceptional circumstances, the study board may grant exemptions from the rules in the curriculum specified solely by the Faculty of Science.

8 Commencement etc.
8.1 Validity
This subject specific section of the curriculum applies to all students enrolled on the programme – see however Appendix 2.

8.2 Transfer
Students enrolled on previous curricula may be transferred to the new one as per the applicable transfer regulations or according to an individual credit transfer by the study board.

8.3 Amendments
The curriculum may be amended once a year so that any changes come into effect at the beginning of the academic year. Amendments must be proposed by the study board and approved by the Dean.

Notification about amendments that tighten the admission requirements for the programme will be published online at http://www.science.ku.dk one year before they come into effect.

If amendments are made to this curriculum, an interim arrangement may be added if necessary to allow students to complete their MSc Programme according to the amended curriculum.
Appendix 1 Tables

Table for students admitted to the programme in September (summer):

*This table is only relevant for students who begin the MSc Programme in February (block 3)
Appendix 2 Interim arrangements

The Shared Section of the BSc and MSc Curricula for Study Programmes applies to all students.

The interim arrangements below only consist of parts where the current curriculum differs from the rules and regulations that were previously valid. Therefore, if information about relevant rules and regulations are missing, it can be found in the curriculum above.

1 General changes for students admitted in the academic years 2016/17

Students admitted to the MSc programme in the academic year 2016/17 must finish the programme as listed in the curriculum above with the following exceptions.

Structure of the programme

The required amount of restricted elective subject elements has been reduced from 45 to 30 ECTS, and correspondingly, the amount of elective subject elements has been increased from 15 to 30 ECTS. All subject elements previously passed as restricted elective will count as elective.

Restricted elective subject elements

<table>
<thead>
<tr>

<td>Statistical Inferens for Markov Processes</td>
<td>7.5 ECTS</td>
</tr>
</tbody>
</table>

* See course specific changes below.

2 General changes for students admitted in the academic year 2015/16

Students admitted to the MSc Programme in the academic year 2015/16 or earlier must finish the programme as listed in the curriculum above with the following exceptions.

Structure of the programme

For students admitted to the MSc Programme in the academic year 2015/16 the MSc programme consisted of 52.5 ECTS compulsory subject elements, 22.5 ECTS restricted elective subject elements, 15 ECTS elective subject elements.

From the academic year 2016/17 the programme has been changed in its composition of the compulsory and restricted elective subject elements. The amount of compulsory subject elements has been reduced from 52.5 ECTS to 30 ECTS and the 22.5 ECTS are added to the restricted elective part of the programme.

From the academic year 2017/18 the required amount of restricted elective subject elements has been reduced from 45 to 30 ECTS, and correspondingly, the amount of elective subject elements has been increased from 15 to 30 ECTS. All subject elements previously passed as restricted elective can count as elective.

Compulsory subject elements

In the academic year 2016/17 the following subject elements are no longer compulsory:

<table>
<thead>
<tr>
<th>Subject Code</th>
<th>Subject Name</th>
<th>Block</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NMAK11003U</td>
<td>Advanced Probability 1 (VidSand1)</td>
<td>Block 1</td>
<td>7.5 ECTS</td>
</tr>
<tr>
<td>NMAK11011U</td>
<td>Advanced Probability 2 (VidSand2)</td>
<td>Block 2</td>
<td>7.5 ECTS</td>
</tr>
<tr>
<td>NMAA13025U</td>
<td>Theoretical Statistics (TeoStat)</td>
<td>Block 4</td>
<td>7.5 ECTS</td>
</tr>
<tr>
<td>NMAA13024U</td>
<td>Conditioning and Markov Properties (Beting)</td>
<td></td>
<td>7.5 ECTS</td>
</tr>
</tbody>
</table>

* See course specific changes below.
Restricted elective subject elements

30 ECTS are to be covered as subject elements from the following list:

- Restricted elective subject elements offered as part of this curriculum (see above)
- NMAK15014U Gaussian Graphical Models Discontinued* 7.5 ECTS
- NMAK15013U Functional Data Analysis Discontinued* 7.5 ECTS
- NMAK15019U Phase-type distributions: Theory and applications Discontinued* 7.5 ECTS
- NMAK15020U Statistical Computing Discontinued* 7.5 ECTS
- NMAK15017U Inference in Hidden Markov Models Discontinued* 7.5 ECTS
- NMAK15021U Statistical Methods and Probability in Bioinformatics Discontinued* 7.5 ECTS
- NMAK15022U Stereology Discontinued* 7.5 ECTS
- NMAK14022U Statistics for non-linear time series models Discontinued* 7.5 ECTS
- NMAK16021U Weak Convergence of Probability Measures Discontinued* 7.5 ECTS
- NMAK16002U Bayesian Statistics Discontinued* 7.5 ECTS
- NMAK14013U Modelling Dependence in Discrete Time Discontinued* 7.5 ECTS
- NMAK16017U Statistical Inferens for Markov Processes Discontinued* 7.5 ECTS

* See course specific changes below.

Appendix 3 Description of objectives for the thesis

After completing the thesis, the student should have:

Knowledge about:
- Scientific problems within the study programme’s subject areas.
- A suitable combination of methodologies/theories based on international research for use in his/her work with the problem formulation.
- Theories/models on the basis of an organised value system and with a high degree of independence.

Skills in/to:
- Apply and critically evaluate theories/methodologies, including their applicability and limitations.
- Assess the extent to which the production and interpretation of findings/material depend on the theory/methodology chosen and the delimitation chosen.
- Discuss academic issues arising from the thesis.
- Draw conclusions in a clear and academic manner in relation to the problem formulation and, more generally, considering the topic and the subject area.
- Discuss and communicate the academic and social significance, if any, of the thesis based on ethical principles.

Competences in/to:
- Initiate and perform academic work in a research context.
- Solve complex problems and carry out development assignments in a work context.
